

## VD34 DUAL-TIME USER MANUAL

### INITIALIZE THE SETTINGS

When setting your watch for the first time, or after changing the battery, you must first zero the dual-time hands (set the dual-time hour hand to "12", and set the dual-time minute hand to "60").

1. Pull the crown out to the first click
2. Press and hold A and B simultaneously for 2 seconds, then release.
3. Press A or B repeatedly to adjust the dual-time hour hand straight up to the 12 position and the dual-time minute hand to the 60 position. (Button A will move the hands back, and button B will move them forward. You can press and hold A or B to speed this process.)

Now you can set the time and dual-time settings.

### SETTING THE TIME

1. When the second hand is at the 12:00 position, pull the crown to the first stop and rotate to set the time. Make sure the 24-hour hand is showing the correct hour.
2. Press the crown back in firmly.

### SETTING THE DUAL-TIME

1. With the crown pressed in, press button A to set the dual-time back one hour, or button B to set the dual-time ahead one hour.
2. When the second hand is at the 12:00 position, pull the crown out to the first click, and press A repeatedly to set the dual-time back one minute per button press, or button B to set the dual-time ahead in one-minute increments. (Note: The dual-time minute hand will make a full revolution at each quarter hour position - this is a normal feature.)
3. Press the crown back in firmly.

### BATTERY:

Silver Oxide 371, 1.55 V (included)
